Eight secrets of Beijing

Snapshots of a 3,000 year-old city

Future past

10 accurate predictions from science fiction

Tablet truths

Can tablet PCs make it in healthcare?

Barco, what else?

In February 2011, Nespresso launched its brand new small brewer named Pixie, with a breathtaking multimedia production live on stage. This production was realized by Concept Solutions GmbH, with Barco image processing and projection technologies provided by Barco partner Grothusen AV. Strukt design studio created the content and projection mapping for the show.

A visual masterpiece is best shown in images, however. Check out the 'making of' and the show video on our website.
